Environmental Policy Statement

Phase Technology was founded in August 1993. Phase Technology offers Facilities Managers and Health and Safety Representatives within the commercial sector professional consultancy advice and practical help in the area of legislative documentation concerning the environmental impact of building services on both the occupants of buildings and personnel utilising their services.

Phase Technology combine years of experience for chemical and microbiological analysis, and, coupled with practical expertise in the treatment of Building Services Air Plant and Water Systems, they offer a unique approach to this field. Phase Technology believes that all aspects of its operation should be carried out in such a way as to have a minimal adverse affect on the environment. The company have therefore incorporated those practicable procedures and controls necessary to prevent environmental damage and pollution. Phase Technology where appropriate will identify to its clients any areas where we observe areas of environmental impact. Our key environmental considerations are:

Legislative Compliance: Phase Technology Ltd are committed to comply will all relevant environmental legislation and applicable and codes of practice.

In particular, legislation concerning building services including water systems.

Waste Management: Waste is managed effectively to prevent its escape into the environment. All waste generated from on-site operations is controlled to prevent is escape and negative impact.

Training: All Phase Technology Ltd technicians are trained to a high level to ensure that they deliver a professional service and to prevent negative environmental impact.

Continual Improvement: to ensure that Phase Technology are at the forefront of the market they are constantly striving for continual improvement in their business and environmental performance and therefore set improvement objectives and targets.

Phase Technology will set annual objectives designed to ensure continual improvement in its Company environmental performance. These objectives are reviewed at the Management review meetings. The objectives and Environmental Policy are communicated to all Phase Technology staff.

This policy is available to the general public and interested parties on application to the Managing Directors.
